DETAILED ACTION

DRAWING FOR REFERENCE

FIG. 4 (6,042,597)

### ***Claim Objections***

Claim 13 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim (claim 12).

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 14 dependent to claim 13 is therefore is objected as well.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 21, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by KWEEN et al (6,042,597).

As to claims 1, 21 and 23, KWEEN (Fig. 4 as shown on page 2, this office action) discloses a stent 40 preferably expanded by balloon (column 3, lines 29-36) having substantially cylindrical elements 11, interconnecting members/means for connecting adjacent cylindrical elements together 14, at least two adjacent valley and adjacent peak portions on each cylindrical element 11 are capable of nesting when the stent is crimped or collapsed.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2, 5, 8 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over KWEEN et al (6,042,597).

As to claims 2, 5 and 8, KWEEN discloses substantially all structural limitations as recited in the claim, except for each cylindrical element of the stent has at least two valley portions or two peak portions with different longitudinal lengths. It would have been an obvious matter of design choice to make at least two valley portions or peak portions having differing lengths, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

As to claim 22, KWEEN discloses substantially all structural limitations as recited in the claim. KWEEN does not explicitly disclose the stent is self-expanded. As stated, KWEEN, column 1, lines 38-45), it is well known to make self-expandable stent from a shape-memory alloy, such as Nitinol for easy stent deployment inside a blood vessel. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make KWEEN stent of Nitinol, for example, to make KWEEN stent a self-expandable stent so as to facilitate the stent deployment inside a blood vessel.

***Allowable Subject Matter***

Claims 3-4, 6-7, 9-12, 15-20, 24-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
